

## Repository Structure

This code repository includes the Python package containing all our source code: [fmcib](#), as well as the code to reproduce experiments and analyses presented in our paper. The pipelines to reproduce our experiments and analyses are independent of the python package and will be shared to the public upon publication.

Here is the structure of the repository:

```
|— fmcib/           # The main Python package
|— data/           # Downloading and preprocessing data
|— experiments/    # Reproduce paper experiments
|— models/        # Download and test final models
|— outputs/       # Outputs from pipelines in the study
|— analysis/      # Reproducible analysis for statistics
|— additional_requirements.txt
|— README.pdf
```
